

## ManWinWin implementation & Users training

### ABOUT THE COMPANY

Cork Supply was founded in 1981 by Jochen Michalski, in the well-known wine region of Northern California. Over the next three decades, under Jochen pioneering leadership, the company has multiplied its employees and activity around the world.

With a global production, and Research & development head office in Portugal, while the customer service operations are all around Europe, North and South America, Australia and South Africa, Cork Supply provides its products and services with professionalism to the wine industry, in all the main productive areas around the world.

Nowadays, Cork Supply is one off the main suppliers of natural corks for the wine industry globally and is the largest supplier in North America. All Cork Supply products are manufactured with the same commitment towards customer satisfaction and quality assurance, which has earned the company's reputation as Bottling experts within the wine industry.

### SCOPE OF THE PROJECT

Consulting services within the maintenance organization and management of the industrial units of the company, including ManWinWin license, configuration and users' training.

Expected impacts:

-  Establishment of the equipment and maintenance plans inventory.
-  Effective management of preventive maintenance and establishment of the corrective maintenance history.
-  Control of the Man-hour cost in maintenance work.
-  Maintenance Indicators representative of the department performance.

---

The main goal of using ManWinWin software was the organization of the maintenance system in the three industrial units of Cork Supply Portugal, by registering all the equipment, defining the whole policy of preventive maintenance of equipment and facilities, in order to optimize the equipment availability to production, its performance and the final product quality.

The second goal was to obtain cost and efficiency ratios within the Maintenance scope, that allow to frame and follow-up the maintenance activity.

The software is functional and intuitive, offering menus with a simple and accessible graphic design, that allows the user to comprehend its operation.

---

Eng.º Mário Outeiro, Industrial Diretor Cork Supply Portugal
