

Press Release . 10th February 2016

Espinho's Casino chooses InnWinWin

Solverde group, owner of one of the most important casino and hotel chains in Portugal, chose InnWinWin software to manage the maintenance of all gambling machines in Espinho's Casino, near Porto.

The group selected a "Ready to Use" type of solution, in which ManWinWin consultants were in charge of a previous technical survey and recording of the client's technical information in the software's database.

The project included both preventive maintenance plans and record of corrective actions, as well as created the structure for performing FMEA (Failure Mode & Effect Analysis) and stock management features.

After an intensive training period with the client's team, Espinho's Casino was ready to start managing its maintenance needs autonomously, and at this point the Front House Managers are already submitting online maintenance requests in a simple and effective way.

Solverde's InnWinWin project represents one more step towards establishing InnWinWin as the main provider for maintenance management across the Portuguese Hospitality sector (and Building sector, in general), following previous accomplishments with international clients such as Pestana Group, Nau Hotels & Resorts and Ritz Four Seasons.
